

SOFiE ToolBox Informer is a complementary tool for SOFiE Sort developed by U IT for the users or managers in charge of the legal reporting. The tool's main functionality is to inform on the status of all sent and received files of the current or previous activity day.

The screenshot shows the U IT STB Informer v1.2.0 application window. The interface includes a title bar, a menu bar, and a main content area. The main content area is divided into several sections: a top status bar, a left sidebar for filters, a central table of reports, and a bottom section for detailed information. The table displays a list of reports with columns for report number, name, recipient, and timestamps. The interface is annotated with numbered callouts 1 through 9, pointing to various functional areas.
