

SOFiE Sort Batch - Service Contracts

U IT is an independent RegTech company fully dedicated to the Legal Reporting domain in Luxembourg. Since 2010, we supported more than 370 customers including 45 banks and became a reliable and trusted reference.

The practical objective of this service is to provide serenity to our customers by offering guarantees that the legal reports will be sent in due time to the regulators. Depending on your needs and agreements set with the regulators, this offer is adaptable.

Contract standards

- Fixed costs under a yearly contract agreement starting the first month of a new year.
- SLA with two characteristics: maximum times to 1: acknowledge and 2: solve an issue.
- Defined number of maintenance or critic interventions by period (quarter, semester or year).
- Support of the most recent Windows OS.
- Detailed security settings to apply to protect confidential reported data from unsolicited access.

Contract specificities

- Three pre-defined levels of contract : Light, Standard and Premium.
- Personalization of the contract : adapt or modify any parameters to respond to your needs
- Extension of the contract to support other SOFiE account, batched or not (FATCA/CRS/Other types)
- Includes the support of U IT SOFiE Toolbox tools

Pricing

A yearly and fixed price is calculated based on a fee schedule under the following parameters :

- Contract level.
- Category level.
- Personalization and additional services added.
- Extra support to supplementary dedicated services or developments.

Support & Guarantees

A team of SOFiE experts is ready to respond to any incident, maintenance or special need :

- Solve common workflow issues (encryption/sending/reception/decryption – security issues).
- Resolve and find a permanent solution if repetitive problems are encountered.
- Handle the renewal of certificates and guarantee a minimum downtime of the service.
- Help to organise the test when a new type of report is launched.
- Migrate the environment on a new server/OS

We provide our customers the insurance to send the right report at the right time and keep the regulators satisfied.

Included on-site critic intervention / period / Max length	unlimited	
<i>Highest security service contract - for companies who require strong technical guarantees for their SOFiE environment to meet the reports deadlines.</i>		

SOFiE Sort Batch - Service Contracts

Practical information :

Eligibility :

Our service contracts are bound to a SOFiE Batch installation performed by U IT – whether a new installation, or from a previously GUI (manual) configuration, or after a migration of an existing batched installation on a new environment.

It remains possible to apply this service offer to an existing SOFiE Batch environment, but U IT will first need to analyse and probably reconfigure some parameters in order to :

- Correct any misconfiguration and optimize the processes and workflows
- Clean and purge the SOFiE profile(s) of any unnecessary files & folders
- Study, understand and validate the updated configuration
- Perform a specific backup of all the mandatory component files of a SOFiE installation
- Create a detailed installation & configuration report of the environment

In this kind of situation, our best advice is to setup a new environment in parallel of the existing one and proceed with a switch of roles between the current production server and the newly configured one – U IT handles and guarantees all the migration

Costs parameters :

The yearly service contract cost is based on two main variables :

- The volume of reports exchanged the previous full year (which will determine the category)
- The contract level chosen.

This cost can be furthermore adapted due to :

- additional SOFiE batched accounts (Sort or Business).
- merge with the SOFiE ToolBox service contract.
- extended support to other linked products or custom developed tools.

In order to determine the category, please contact CetrelSecurities (*) to receive the following statistics :

- Last year total in/out of all the SOFiE account involved, sorted by account
- Variable : if available and depending on date, the current year first 3, 6 or 9 months

* U IT can handle this task on demand

Linked documents :

- Pricing simulation (price matrix – last year statistics required)
- Maintenance and support agreement template

SOFiE Sort Batch - Service Contracts

These service contracts support the SOFiE Sort batched installation and the SOFiE ToolBox set of tools if available. In any case, this present offer is bound to a SOFiE Sort batch installation or a reconfiguration of an existing one performed by U IT.

Signature will be considered only once the document will be fully filled and accepted by both parties – two “checkbox” representing the final acknowledgment of both parties have to be checked”

The SOFiE Sort Batch installation offer and SOFiE Toolbox license agreement are in separated documents.
